

SAN FRANCISCO CITY IMPACT

WHAT WE DO:

We exist to intervene on behalf of the people of the Tenderloin.

Since 1984, City Impact has been serving the city of San Francisco with a strong belief and desire to see the city transformed by impacting the Tenderloin District and we do that by serving the immediate needs of the community in the areas of poverty, children, and hunger.

HOW WE DO IT:

We are on a mission to make an impact in the Tenderloin by providing relief efforts and a place of community to anyone in need. Through the various programs available, City Impact serves 8,000 people a month.

THE CHALLENGE:

Nearly 50% of San Francisco's homeless population exists within the boundaries of District 6, which includes the Tenderloin. Just one square mile, the Tenderloin neighborhood is home to over 28,000 residents, with nearly 1 out of every 3 residents living dangerously below the poverty line. Tenderloin residents are economically disadvantaged and under-resourced. For those living on the streets and even for those housed in one of the many low-income SRO buildings, accessing basic needs like food, health care, social services, and even community is a daily uncertainty.

poverty line

OUR SOLUTION:

ADOPT-A-BUILDING

Going door-to-door in Single Room Occupancy apartment buildings (SRO's) we provide groceries, hygiene products, and visitation to the elderly, shut-ins, and families with the goal of breaking the barrier of isolation by building long-term relationships.

HEALTH AND WELLNESS CLINIC

Total Wellness goes well beyond the bounds of traditional medicine. We offer dental work and screenings, blood pressure monitoring, blood sugar level testing, foot care, help for minor scrapes and abrasions, physical health screenings, hygiene kits, and access to a network of specialized services.

CITY ACADEMY

San Francisco City Academy, a private K-8th grade school, seeks to inspire students to become lifelong learners through a creative and rigorous curriculum. Throughout each school day, students will engage with standards-aligned content through direct instruction, collaborative group work, and individualized tasks to ensure not just knowledge acquisition, but relevant application.

CITY KIDS

Approximately 2,300 kids under the age of 18 live in the Tenderloin, a neighborhood gripped by extreme poverty, addiction, and violence. We focus our efforts on reaching an increased percentage of the children and youth of the Tenderloin to provide education, mentorship, and community support. City Kids gives children in the Tenderloin access to after-school and community enrichment programs to help provide a safe environment for kids to learn, play, and grow.

RESCUE MISSION

The Rescue Mission is a space where anyone can walk in, sit down, be encouraged, receive a hot meal, and have people available to listen, and connect them to greater resources. Our Rescue Mission serves hot meals and distributes grocery bags to homeless men and women and families in need.

STREET OUTREACH

Going back to what started it all, every month we head out into the Tenderloin with sandwiches to hand out to the homeless. We have conversations, build relationships, and let them know of the services we provide.
